PROFESSIONAL BACKGROUND

I am an IT Infrastructure professional with more than seven years of experience across Internet Services, Property Development, Retail, and Financial Services. Throughout my career, I have progressed from computer and network support roles to senior infrastructure positions supporting business operations, head office environments, and branch networks.

Working in different industries has taught me that successful IT is not only about technology. I enjoy learning how a business operates, understanding users' needs, and finding practical solutions that help people work more effectively. This approach has allowed me to contribute across different business environments while supporting both operational and infrastructure requirements.

Working across different industries has also given me the opportunity to work with people from different backgrounds and cultures, including both local and international colleagues. These experiences have helped me develop strong communication, collaboration, and problem-solving skills, while broadening my understanding of how people and organizations work together to achieve business goals.

I value continuous learning and enjoy taking on new challenges that help improve both technology services and business operations.

PROFESSIONAL EXPERIENCE

Senior Infrastructure Officer

CHOKCHEY FINANCE PLC | May 2025 – Present

• Administer Windows Server, Linux, Active Directory, VMware, and Docker environments supporting head office and branch operations.

• Manage Microsoft 365 accounts, licensing, and access administration, including Teams, SharePoint, OneDrive, and user lifecycle management.

• Support infrastructure security, monitoring, and backup operations using FortiGate, Kaspersky Security Center, Zabbix, NetBox, and Veeam Backup & Replication.

• Develop and utilize PowerShell scripts for infrastructure monitoring, connectivity verification, and routine administration tasks.

• Participate in infrastructure improvement initiatives, disaster recovery activities, business continuity planning, and operational readiness projects.

• Coordinate vendors, maintenance activities, and technical verification of IT assets to support business operations.

Senior Officer, IT Support

Chip Mong Group | Oct 2023 – May 2025

• Provided IT support for retail operations across malls, supermarkets, and retail locations, supporting Microsoft 365, VMware, endpoint devices, and LAN/Wi-Fi services.

• Managed and monitored endpoint connectivity through Ruijie Cloud and Cisco Meraki platforms.

• Supported network infrastructure for live events, live streaming activities, and mall operation requirements.

• Coordinated IT deployment and infrastructure readiness for new store openings, including connectivity, end-user devices, POS systems, and operational support.

• Collaborated with business users, vendors, and construction teams to support retail expansion projects and operational requirements.

• Maintained IT asset records, technical documentation, and service desk activities.

Senior Infrastructure Officer

PROFESSIONAL EXPERIENCE (CONTINUED)

IT Officer
Borey Chea Ry | Mar 2022 – Oct 2023
• Supported daily IT operations for property development activities, including Windows Server administration and business application support.
• Configured and maintained MikroTik routers and UniFi wireless infrastructure.
• Managed CCTV systems, including configuration, monitoring, backup, and remote access support.
• Provided technical support for users, network connectivity, printers, email services, and office infrastructure.
• Maintained computers, network equipment, and security systems supporting day-to-day business operations.

Network Technician
Camko Broadband | Oct 2019 – Jan 2022
• Installed, configured, and maintained internet, cable TV, and VoIP services for residential and business customers.
• Diagnosed and resolved network connectivity issues involving LAN/WAN, VLAN, DHCP, and IP configurations.
• Managed and monitored network infrastructure equipment, including Nortel, 3Com, and Cisco switches.
• Supported wireless deployments, customer network environments, and CCTV systems.

Computer Technician
IT Global Computer | Nov 2018 – Oct 2019
• Diagnosed and resolved hardware and software issues for desktop and laptop computers.
• Installed and maintained printers, CCTV systems, and office IT equipment.
• Troubleshot internet connectivity and network-related issues for customers.
• Provided on-site maintenance and technical support services for business users and factory environments.

TECHNICAL SKILLS

INFRASTRUCTURE & PLATFORM ADMINISTRATION
Windows Server, Linux, VMware ESXi/vSAN, Docker, Active Directory, Microsoft Entra ID
MICROSOFT 365 & COLLABORATION
Microsoft 365 Administration, Exchange Online, Microsoft Teams, SharePoint Online, OneDrive
NETWORKING & SECURITY
FortiGate, MikroTik, LAN/WAN, VLAN, Branch Connectivity, Kaspersky Security Center
MONITORING, BACKUP & RECOVERY
Zabbix Monitoring, Veeam Backup & Replication, NetBox, Infrastructure Monitoring & Troubleshooting
AUTOMATION & SCRIPTING
PowerShell, Infrastructure Automation, Monitoring & Connectivity Automation

SELECTED INFRASTRUCTURE PROJECTS

New Branch & Retail Site IT Deployment
Supported branch and retail site IT deployments, including network connectivity, user readiness, device installation, and operational support before launch.
Head Office & Data Center Relocation
Participated in infrastructure relocation and deployment activities to help maintain service continuity and minimize disruption during migration.
Disaster Recovery (DR) & Infrastructure Recovery
Supported infrastructure recovery activities, disaster recovery planning, and technology readiness initiatives to strengthen business continuity.
Construction & Site Infrastructure Preparation
Prepared network, CCTV, and infrastructure requirements for engineering and construction projects, ensuring technology readiness before site operations.
Infrastructure Monitoring & Documentation Improvement
Improved infrastructure visibility and troubleshooting capabilities through Zabbix monitoring and NetBox documentation management.
Infrastructure Automation with PowerShell
Developed PowerShell scripts to automate infrastructure checks, connectivity monitoring, and recurring administrative tasks.

EDUCATION

Bachelor of Science in Information Technology
Royal University of Phnom Penh, 2016–2020

TRAINING & CERTIFICATIONS

FortiGate Administrator — Proseth Informatics, 2026
